

# AMPED: MANGLED GUITARS

## QUICKSTART INSTALLATION GUIDE

***AMPED: MANGLED GUITARS WILL NOT WORK IN KONTAKT PLAYER OR ACTIVATE IN NATIVE ACCESS!***

### Step 1: Downloading AMPED: MANGLED GUITARS

Follow the downloader instructions to retrieve Waterharp Xpressions. The files will extract to a single folder called “**Sampletraxx - Amped Mangled Guitars**”. You may put this folder anywhere on your computer or external drive. *Note: Product requires at least 362 MB of free storage space.*

### Step 2: Kontakt Software Installation

To use Waterharp Xpressions, you **must** first install the latest version of the full paid version of the KONTAKT playback engine (version **7.10.6** or higher).

*Kontakt updates can be installed by launching the NATIVE ACCESS app and navigating to “Updates”.*

### Step 3: Using AMPED: MANGLED GUITARS

Inside the “**Sampletraxx - Amped Mangled Guitars**” folder you will find the **AMG - .nki** files and **Samples** folder. Please use the following steps as a guide:

1. Open **Kontakt** as a Virtual Instrument in your DAW.
2. Go to the **Files** dropdown menu in Kontakt and navigate through the directory to the **AMG - .nki** files in the **Sample Logic - Amped: Mangled Guitars** folder.
3. Double-click or *drag* a **AMG - .nki** into Kontakt to load.
4. As an alternative, you may navigate directly to the file location using your computer’s Finder or Explore window feature and *drag* a **AMG - .nki** into Kontakt to load.
5. For expedited loading, add the **Sample Logic - Amped Mangled Guitars** folder or the **AMG - .nki** files to Kontakt’s **Quick-Load**. Choose Quick-Load from the VIEW dropdown menu and then *drag* the folder or any number of **AMG - .nki** files to the Quick-Load window.

### TROUBLESHOOTING

If Amped: Mangled Guitars is loading in **DEMO** mode, you are using Kontakt Player. You **must** use the full paid version of Kontakt. You will need to purchase Kontakt if you don’t own it, or make sure the plugin is updated to the full version in your DAW. Sometimes the free version loads by mistake.
